

Universal charger for rechargeable Li-Ion, NiCd and NiMH batteries

Features:

- Available in 4 and 8 bay-charger version
- Battery voltage from 1,2V (NiCd/NiMH) to 36V (Li-Ion)
- Microprocessor controlled charging procedure
- Separate board and combinatorial circuit for each charging compartments
- Simultaneous charging of different battery types and sorts
- Visually charge level indicator by LED RED/GREEN
- Monitoring battery temperature
- Trickle charging after complete charge
- Detection of defect cells
- Bootloader for software update
- Convection cooling (fanless)
- Quick and simple changing for the battery adapter
- Battery adapter for almost high quality tools can be freely combined

Technical Data:

Battery voltage:	1,2V -24V NiCd- and NiMH-batteries 3,6V -36V Li-Ion- and Li-Po-batteries 2V - 24V PB - accumulator
Charging current:	0,5 - 3,5 A (effektiv)
Input:	115V AC 50-60Hz, 0,48KW
Output:	4-bay max. 520 Watt / 8-bay max. 1040 Watt
Cooling:	Fan control, thermal controlled
Protection class:	IP20, tested CE
Dimensions / weight	ULG36-04 530 x 165 x 320 (wxhxd in mm), 11 kg ULG36-08 530 x 310 x 320 (wxhxd in mm), 19 kg

Be always one step ahead....

The ULG36 line can already charge the newest Li-Ion batteries for cordless shutt-off screwdrivers from the following manufacturers:

- ⇒ Atlas Copco
- ⇒ Bosch
- ⇒ Fein
- ⇒ Makita

... and also the Li-Ion batteries from Gesipa
